# SECURITY SYSTEM & IT HARDWARES

## Security Surveillance System

We take care of all the physical security management providing comprehensive sustainable and effective security services of the highest quality, with the necessary technology to predict, prevent and minimize the risk of the possible loss.

## Networking

With our expertly trained IT professionals at your service for support and maintenance across Saudi Arabia can be there, wherever your "there". We partner with the best networking vendors, and bring award winning expertise to your networking projects.

## Biometric Devices And Access Control

Our innovative visible light facial recognition reader dedicated to InBio series biometric controller to adopt facial recognition technology, offering one of the fastest, stable and most accurate facial recognition experiences.

## Metal Detector & Turnstiles

Our turnstile products are designed with built-in metal detector which enhances security level and greatly boosts the efficiency of security check. By combining inspection and access control, manpower can also be saved up. It is applicable to the entrance of supermarkets, factory, station, school and building that needs security inspection management.

## Smart Home And Intercom Solutions

Smart Automation become more intelligent enabling you to easily operate them from a smart phone, tablet, keypad, or touch panel. Effortlessly control your AC, listen to your favorite music from any area of the home with a single button press or set the lights and shades to create entertaining ambiance.

## Digital Signage

Exclusive & reliable digital signage solutions through which one can display dynamic videos, images, text and more direct to display screens anywhere, anytime! This further helps to capture your audience's attention, build brands, improve customer experience and drive sales.

## Queue Management Systems

Manage & Minimize Queues with Improved Efficiency & Better Customer Service. Queue management systems help in increasing service efficiency, decreasing average wait times and adding advertising and promotional opportunities right into the queue.

## Point Of Sale Solutions

Point of Sale Machines designed to deliver increased efficiency with ease of use. They offer advanced inventory and employee management capabilities also ensuring better customer services. They offer faster service with detailed receipts further streamlining the accounts process.

## Self Service Kiosks

Innovative, well managed & Best Service in Areas with High customer traffic. Self Service Kiosks give consumers choice and flexibility to carry out their work at a more convenient level. Kiosks can be used as a check in-out kiosk, informational kiosk, way finding kiosk, lobby kiosk, and survey kiosk.

## Softwares And It Hardwares

We provide set of software and IT hardware that an organizations requires to manage day-to-day business activities such as accounting, procurement, and inventory and supply chain operations. A complete ERP software that helps plan, budget, predict, and report on an organization's financial results.
